

Hardball

cricket equipment
built to last

What is **Hardball** ?

Hardball is highly durable, long lasting cricket ground equipment, built by engineers who have extensive experience in manufacturing and installing structures that have to be built to last .

Cricket ground equipment has to stand up to tough conditions – pounded by cricket balls, battered by strong winds and lashing rain during the months outside the cricket season and at risk of vandalism !

Why are **Hardball** products different ?

Hardball cricket ground equipment is manufactured in the UK. The production partner who manufactures Hardball for Diversity Products began fabricating durable, steel equipment for use in the hostile underground environment of the mining industry back in 1991. Recognition that product durability and longevity were key in other markets led to the expansion of its product range into street furniture, playground equipment and sports complexes, all of which have to stand up to harsh treatment by their users.

Hardball Warranty

Hardball products carry a **25 YEAR** warranty* on the structural integrity of the steelwork and a **5 YEAR** guarantee on all powder coated surfaces. There is no cricket equipment supplier who gives its customers such confidence and after sales support as Hardball.

Hardball also offers an After Sales Support Service to allow Cricket Clubs to :-

- order, and have fitted, replacement parts
- request additions or extensions to existing equipment
- arrange on site refurbishment work

Where can I buy **Hardball** ?

Hardball cricket ground equipment is supplied direct by Diversity Products Ltd, so if you would like a quotation, or to discuss a more complex project, then contact Diversity by phone or e mail - contact details are on the back page of this brochure.

Who installs **Hardball** ?

Every cricket ground's requirements are different, so the first step, when we receive any Hardball enquiry, is an on site visit. This not only allows the customer to tell us exactly what they want and where, but also allows Diversity to fully assess the cricket ground.

All the Hardball components are then manufactured to order, which takes about 3 - 4 weeks.

Installation is carried out by the experienced team of Diversity's Hardball production partner and is completed within 1 week.

* The Hardball Warranty is subject to the following conditions - a proven date of installation is provided, the item has been installed by Hardball's installation team or a Hardball approved sub-contractor and the item has not been misused or vandalised.

Hardball Sliding Sight Screens on Runners

Product Overview

Robust weather resistant structure with easy to use runner mechanism for one man operation. Screens are easily taken off the runners (for storage, if required), but are lockable, so cannot be removed by unauthorised personnel or vandals.

Materials

Frame

- 80 x 80 x 3mm box section uprights.
- 100 x 50mm channel bottom runner.
- 50 x 50mm angle top runner.
- 50 x 50mm box section screen frame.

Lathes

- 200mm wide aluminium.

Runner Wheels

- 100mm diameter nylon.

Structure

- Total length of structure to match the square
- Horizontal track runs 1 metre above ground level, allowing advertising space below.
- Track is supported by upright posts, set 600mm deep into concrete foundations.
- Distance between posts - 3 metres.
- Horizontal and vertical runners hold the sight screen in place at both ends.
- Sight Screen dimensions - 4m x 4m, giving a top height of 5 metres.
- The screen can be split to cover both 'over' and 'round' the wicket bowling without the need to move the screen during matches.
- Advertising space on bottom section of the screen
